

7th European Conference on FASD 2024

Madrid (Spain), 2024, September 22+23-25

Welcome

The European FASD Alliance is pleased to present to you the Seventh European Conference on FASD Fetal Alcohol Spectrum Disorders: clinical and biochemical diagnosis, screening and follow-up, which will take place in Madrid, September 22 to 25, 2024.

The main goal of this conference is to bring together European researchers, clinicians, public health workers, FAS-related NGOs and parents in order to share latest knowledge and promote collaborations.

Our objective has been to open your minds to new ideas about FASD, related to diagnosis, prevalence, biomarkers, interventions, quality of life, etc., and also to open a window to scientific research and public opinion. We hope this meeting in Madrid will be the next step to a multifactorial point of view of FASD, including also parents of children with biological, foster or adoptive families.

In the confusion of non-scientific opinions about alcohol consumption during pregnancy, with many deleterious economic interests, our message is still **no evidence of harm does not mean evidence of no harm**. In short, no level of alcohol consumption during pregnancy can be considered safe.

We are looking forward to meeting you in Madrid for this exciting event.
